

## CONTENTS

<b>01</b>	<b>Thieu Huu Cuong, Pham Minh Nghia, Phan Huy Anh</b>	<b>01 – 10</b>
	A novel coherence optimization algorithm for forest height inversion using single-baseline PolInSAR images.	
<b>02</b>	<b>Do Thanh Quan, Bui Tien Anh, Do Khanh Vinh, Bo Quoc Bao</b>	<b>11 – 19</b>
	Development of data power control algorithms for downlink transmission in cooperative Wireless Body Area Networks.	
<b>03</b>	<b>Ta Chi Hieu</b>	<b>20 – 27</b>
	Design of equalizers for frequency selective MIMO systems with low redundancy.	
<b>04</b>	<b>Nguyen Van Tuan, Truong Dang Khoa, Pham Trung Dung, Dinh Huu Tai</b>	<b>28 – 34</b>
	A spike trains encoding and decoding solution for the spiking neural networks.	
<b>05</b>	<b>Nguyen Thi Van Anh, Nguyen Duy Hung, Tran Huu Phuoc, Nguyen Danh Huy, Nguyen Tung Lam</b>	<b>35 – 44</b>
	Hierarchical sliding mode control and disturbance observer for the double inverted pendulum on a cart.	
<b>06</b>	<b>Nguyen Quoc Minh, Nguyen Duy Linh, Nguyen Trong Khiem, Tran Huu Quynh, Pham Tuan Nghia, Bui Minh Quan</b>	<b>45 – 53</b>
	Optimization models to flatten duck curve in power grid with high penetration of solar energy.	
<b>07</b>	<b>Nguyen Thanh Duong, Nguyen Van Duy</b>	<b>54 – 62</b>
	Low power consumption gas sensor based on In <sub>2</sub> O <sub>3</sub> nanowires in detecting hazardous gases.	
<b>08</b>	<b>Le Van Long, Bui Son Tung, Bui Xuan Khuyen, Bui Huu Nguyen, Vu Dinh Lam</b>	<b>63 – 72</b>
	Electrically reconfigurable metamaterial absorber operating in C band.	
<b>09</b>	<b>Rudy Agus Gemilang Gultom, Syachrul Arief, Muhammad Hanifudin Al Fadli</b>	<b>73 – 84</b>
	Design of a weaponized drone munitions system with a bomb simulation using PVC material.	
<b>10</b>	<b>Chu Thi Quyen, Ngo Thi Thanh Hoa, Nguyen Thi Cam Ngoan</b>	<b>85 – 95</b>
	Prediction of Air Quality Index using genetic programming.	
<b>11</b>	<b>Nguyen Hai Nam, Phung Van Binh</b>	<b>96 – 106</b>
	Implementing PGD technique in solving the problem of identifying Young's modulus of linear elastic isotropic material from full-field measurements by FEMU method.
